The Intelligent P2P AGENTIC AI Procurement Engine

EXECUTIVE SUMMARY

Your procurement process spans dozens of steps, people, and systems. Our platform deploys specialised AI agents at every stage — eliminating delays, errors, and invisible bottlenecks.

What It Is

How It Works

A multi-agent AI orchestration platform that sits on top of your existing ERP and business processes. Each AI Agent is trained on your specific procurement rules, approval hierarchies, ERP schema, and It automates repetitive tasks, follows up on stalled approvals, validates documents, and keeps every vendor relationships. Agents collaborate, escalate intelligently, and hand off work seamlessly — just stakeholder informed — without replacing your systems. like a high-performance team would.

P2P AGENTIC AI

PROBLEM STATEMENT

THE REALITY OF TODAY'S PROCUREMENT

Your Process Is Quietly Failing You

Invoice Mismatches & Disputes

Behind the spreadsheets, email chains, and manual approvals lies a costly tangle of delays, errors, and missed controls. Invoices don't match POs or GRNs. Finance teams manually investigate each mismatch. Vendors chase payment. Early payment discounts are regularly missed.

↑ 15–30% Invoice Exception Rate

Approval Bottlenecks

Manual Quotation Comparison

PRs and POs sit in inboxes for days. Approvers are not reminded. Urgent purchases get bypassed through informal channels — creating maverick spend and audit exposure. Procurement teams compare vendor quotes in Excel. There is no audit trail, no consistency, and significant room for human error — or worse, subjectivity in vendor selection. Compliance Gaps

↑ 3–7 Day Average Delay

↑ Hours per RFQ Cycle

Procurement decisions happen outside the system. Approval limits are breached. Preferred vendors are bypassed. Audit trails are incomplete or entirely non-existent.

Zero Visibility

ERP Customisation Chaos

↑ Audit & Regulatory Risk

No single dashboard shows where every PR, PO, invoice, or payment stands. Management makes decisions based on stale or incomplete information from multiple systems. Every company has customised its ERP differently. Automation tools built for standard processes break down in customised environments and require expensive rework to function.

↑ Reactive Decision-Making

↑ High Implementation Failure Rate

WHAT IS AGENTIC AI?

AI That Acts, Not Just Advises

WITH AGENTIC AI

- ✓ Auto follow-ups with smart escalation

- ✓ POs created instantly on approval

- ✓ 3-way match runs in seconds

- PO creation waits for manual input

- ✓ Exceptions routed with full context

- Invoice matching done in spreadsheets

- ✓ Vendors get

- Exceptions sit unresolved for days

- ✓ Real-time dashboards, always current

- Vendors call finance for payment updates

- Reports pulled manually at month end

and procurement standards to decide

Each agent applies your business rules, approval policies, and procurement standards to decide the right next action. "Humans set the rules. Agents

"Humans set the rules. Agents follow them relentlessly — with full transparency and a complete audit trail at every step."

Act

Agents execute tasks directly: update ERP records, send follow-ups, validate invoices, create POs, flag exceptions — autonomously.

Escalate & Learn

When human judgment is needed, agents escalate with full context. They continuously improve based on outcomes and feedback.

P2P AGENTIC AI STAGE-BY-STAGE AUTOMATION

AI USE CASES BY PROCESS STAGE

Where AI Agents Take Over

PROCESS STAGE	TODAY'S PAIN	WHAT THE AI AGENT DOES	HUMAN CONTROL	OUTCOME
PR Creation	Manual data entry, wrong GL codes, incomplete fields		R E T A I N E D	↓ 80% data entry time
PR Approval	Approvers don't respond for days, urgent PRs delayed		↓ 70% approval delay	
Vendor Sourcing	Manually browsing vendor database, inconsistent shortlisting	Reads request, pre-fills ERP fields, suggests GL codes and cost centres		Final submission & review
Quotation Comparison	Comparing quotes in Excel, no audit trail, bias risk	Sends smart reminders, escalates after SLA breach, tracks response	Approval decision	↓ 95%
PO Creation	Wait for someone to manually create PO after approval	Searches approved vendor list, scores vendors on price, quality & history		Final vendor selection
Same-day PO issuance	Manual invoice entry, high error rate, lost invoices		↓ 85% manual processing	
Invoice Processing		Normalises & compares quotes, generates scored comparison matrix	Award decision	100% match coverage
		Auto-creates PO in ERP immediately upon PR approval — no delay	PO approval & release	↓ 60% resolution time
		Reads invoices via OCR, extracts data, validates fields, logs in ERP	Exception review	↑ On-time payment rate
3-Way Match	Manual cross-check of PO, GRN, and Invoice each time line	Runs automated match in seconds across all three documents, line by line	Resolution decision	Dispute resolution
			Final payment authorisation	
Exception Handling	Exceptions sit unresolved, causing payment delays	Classifies exceptions, routes to right person with full context attached		
Payment Processing	Payment approvals bottlenecked, vendors complain payment	Validates readiness, triggers approval workflow, confirms vendor		

P2P AGENTIC AI

Adapts to Your ERP,
Not the Other Way Around

SAP (S/4HANA & ECC)

Enterprise ERP

- › Connects via BAPI, RFC, and OData APIs
- › Works with custom Z-tables and ABAP logic
- › Supports complex approval matrix configurations
- › Reads custom posting rules and tolerance groups

Microsoft Dynamics 365

Cloud ERP

- › Integrates via Power Platform and Dataverse APIs
- › Handles custom entities and business flows

- › Reads approval rules from custom Power Automate flows
- › Supports both F&O and Business Central variants

Oracle ERP Cloud & Fusion

Enterprise Cloud ERP

- › REST API and FBDI-based integration
- › Supports Oracle Procurement Cloud workflows
- › Custom flexfields and descriptive segments handled natively

CUSTOMISED ERP INTEGRATION

- › Compatible with Oracle iProcurement setups

Vendor Portals & Third-Party

External Ecosystems

Legacy & In-House ERP

Email + Excel Workflows

- › Connects to supplier portals via API or RPA

- › Sends and receives POs, invoices, and status updates

Custom Built Systems

Hybrid Environments

- › Manages communication with vendors at scale

- › Adapts via database-level connectors or screen reading
- › No changes required to existing system

- › Reads approval emails and extracts structured decisions
- › Processes Excel quote comparisons automatically

- › Tracks vendor acknowledgements automatically

- › Reads from SQL Server, Oracle DB, MySQL, and more
- › Functions even without formal APIs

- › Converts ad-hoc email processes into audited workflows
- › Bridges the gap between email and ERP

No Rip-and-Replace

 Fast Deployment

Secure by Design

Fully Configurable

PAIN POINTS SOLVED

REAL-WORLD BUSINESS SCENARIOS

From Real Problems to Measured Outcomes

⚡ Delayed PR Approvals Driving Urgent Purchases

Vendor Quotation Comparison Done in Excel

PAIN POINT

PAIN POINT

PR sat in manager's inbox for 6 days. Team bought supplies from a local vendor at 40% premium, bypassing Excel. No audit trail. Selection later challenged procurement policy entirely.

Procurement officer spent 3 days comparing 8 vendor quotes in Excel. Selection later challenged by internal auditors.

AI SOLUTION

AI SOLUTION

Approval Follow-up Agent sends escalating reminders at 24h, 48h, and auto-escalates to skip-level at 72h with weighted scoring criteria, and generates a complete context attached.

Sourcing Agent collects quotes, normalises formats, applies transparent comparison report in minutes.

OUTCOME

OUTCOME

Average approval time drops from 6 days to under 18 hours. Zero maverick buys driven by approval delays. maintained. 100% defensible to auditors and management.

Quote evaluation completed in 20 minutes. Full audit trail

↓ 85% Approval Wait Time

3 Days → 20 Minutes

Invoice Mismatches Causing Payment Delays

Vendor Complaints — No Communication

PAIN POINT

PAIN POINT

30% of invoices fail 3-way match. Finance team spends 2 weeks each month resolving mismatches. Vendors status, invoice processing, and payment dates.

Vendors call finance 5–10 times per week asking about PO

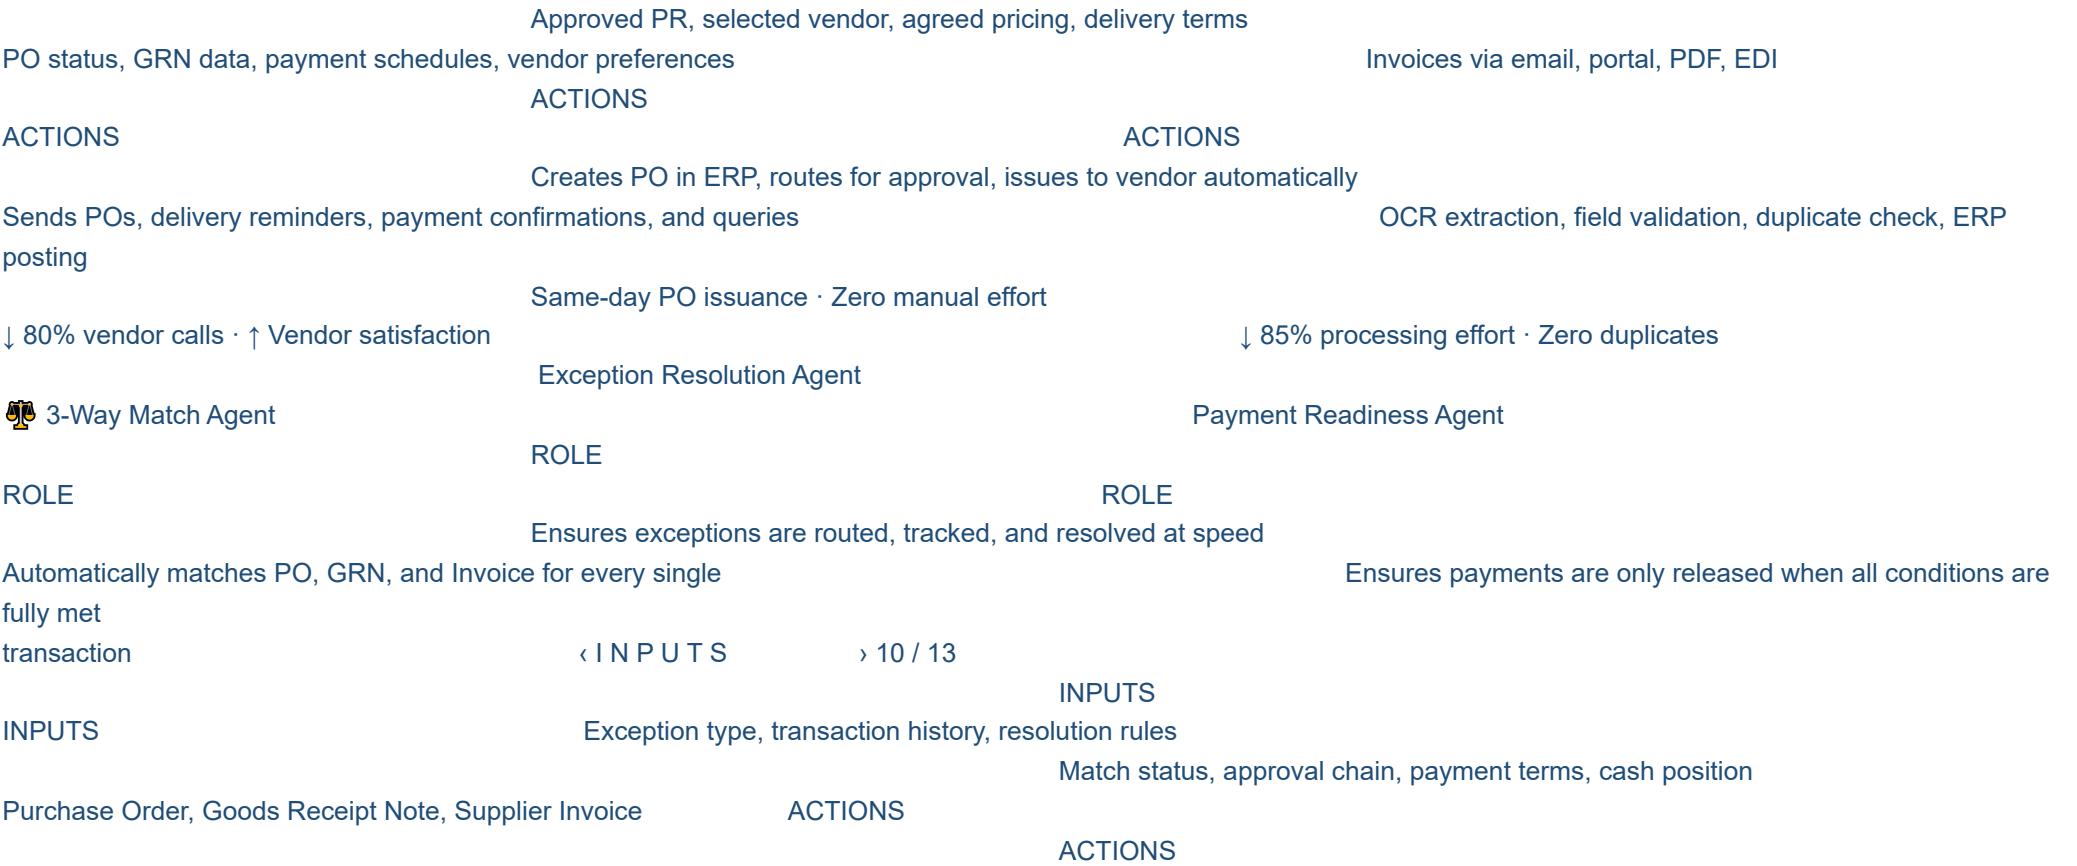

face consistent late payments.		Team spends hours on vendor calls.	
AI SOLUTION		AI SOLUTION	
3-Way Match Agent runs on every invoice within seconds of receipt. Mismatches are classified and routed to every milestone — PO issuance, GRN the right resolver with a pre-filled resolution form.		Vendor Communication Agent sends proactive status updates at confirmation, invoice receipt, payment approval.	
OUTCOME		OUTCOME	
Match exceptions resolved in <24 hours. On-time payment rate rises from 62% to 94%. Vendor satisfaction enabled. Vendor satisfaction scores rise improves significantly.		Inbound vendor calls drop by 80%. Vendor portal self-service substantially.	
↑ 94% On-Time Payment Rate		↓ 80% Inbound Vendor Calls

IMPLEMENTATION APPROACH

HOW WE GET YOU THERE

Live in Weeks, Not Months

Our phased delivery model provides early value quickly, then expands progressively — minimising risk and maximising user adoption at every stage.

Phase 1	Phase 2	Phase 3	Phase 4
Discovery & Mapping	ERP Integration	Pilot Launch	Full Rollout
Week 1–2	Week 3–5	Week 6–8	Week 9–12
Map your existing P2P process. Identify ERP configuration. Define business rules, approval policies, and agent parameters. Baseline current performance metrics.	Connect platform to your ERP, email, and document systems. Configure agent parameters. Test data flows and integration points end-to-end with real transactions.	Go live with core agents on a pilot department. Refine rules based on real transactions. Train users. Measure and report early wins to stakeholders.	Expand to all departments and process stages. Activate all 12 agents. Enable executive dashboards. Transition to continuous improvement and optimisation mode.
No Business Disruption Existing systems stay in place throughout the entire process	ROI Visible from Week 8 Early value delivery from pilot phase — measurable and reportable	Continuous Improvement Agents learn and improve with every transaction cycle
